About Me

To use my skills in the best possible way in order to achieve the goals of the organization I work with and to build a long-term progressive career as an employee and professional with great opportunities for career growth.

Project

Virtual Trial Room

Utilizing Image Processing and 3D Model Manipulation for the Virtual Trial Room Project
In order to create the Virtual Trial Room, we are employing cutting-edge technology such as image processing and 3D model manipulation. The image processing aspect is used to obtain textural data from clothing images, while 3D model manipulation is utilized to incorporate the textural data into a model wearing the clothes.
